SUMMARY

Curious and self-driven MCA student with hands-on experience in AI/ML, Python, and applied research. Experienced in taking AI ideas from data understanding to deployable solutions, including model experimentation and basic API integration. Strong interest in building AI features that are used in real products, learning FastAPI-based workflows, and writing clean, production-oriented code.

EDUCATION AND CERTIFICATION

Master of Computer Application (2024-2026) | JECRC University

Bachelor of Computer Application (2021-2024) | JK Lakshmipat University

GBSE Board Senior Secondary (XII), Commerce (2020-2021) | Shree Swaminarayan Gurukul Higher Secondary

GBSE Board Secondary Education (X) (2018-2019) | Shree Swaminarayan Gurukul Maruti Vidhyapeeth

SKILLS

Programming: Python, C++

AI / ML: Machine Learning Basics, Model Training, Model Inference, Dataset Handling

Libraries: NumPy, Pandas, TensorFlow

Backend & APIs: Django, Django ORM, REST APIs

Databases: MySQL, RDBMS

Tools: Git, Google Cloud, Power BI, Heroku

PROJECTS

Inventory Management System | Django, Python, MySQL, Bootstrap:

Developed a web-based inventory management system with secure user authentication, product and category CRUD operations, search, pagination, and stock management. Implemented a responsive dashboard with MySQL integration to efficiently track inventory and streamline daily operations.

Crop Recommendation | Python, Scikit Learn, Pandas, Random Forest:

Developed a Machine Learning-based Crop Recommendation System using Python, Scikit-learn, Pandas, and Random Forest to recommend suitable crops based on soil nutrients and environmental conditions.

Performed data preprocessing, exploratory data analysis (EDA), model training, and evaluation, achieving accurate crop predictions to support data-driven agricultural decision-making.

INTERNSHIP

Human Action Recognition Research Intern – LNMIIT Summer Internship (May – July 2023 | On-site)

- Analysed KTH dataset using Python & TensorFlow.
- Applied regularization and built a reproducible pipeline for scalable documentation

CERTIFICATES

- **Google Cloud Career Readiness - Google Cloud Learning Platform (May 2023)**
Comprehensive knowledge of cloud architecture, deployment, and management

ACHIEVEMENTS

- IJNRD International Journal (Review Paper 2025)
