PROFESSIONAL SUMMARY

Master of Computer Applications (MCA) graduate with hands-on experience in Machine Learning, Python, NLP, and applied AI research. Experienced in data preprocessing, exploratory data analysis, model training, evaluation, and deploying ML models through REST APIs. Seeking an entry-level AI/ML Engineer role to build production-oriented, data-driven solutions.

EDUCATION

Master of Computer Applications (MCA) | JECRC University 2024 – 2026

Bachelor of Computer Applications (BCA) | JK Lakshmipat University 2021 – 2024

TECHNICAL SKILLS

Languages: Python, C++, JavaScript

Machine Learning: Scikit-learn, Random Forest, Logistic Regression, EDA, Data Preprocessing, Model Training & Evaluation, Hyperparameter Tuning

NLP: NLTK, CountVectorizer, N-Gram, Text Preprocessing

Backend & APIs: FastAPI, Django, Django ORM, REST APIs

Databases: MySQL, SQL

Tools & Platforms: Git, Google Cloud Platform, Render, Vercel, Salesforce

PROJECTS

Crop Recommendation System | Python, Scikit-learn, Pandas, Random Forest

- Built a machine learning system that recommends suitable crops based on soil nutrients and environmental conditions, using a Random Forest classifier.
- Performed data preprocessing and exploratory data analysis (EDA) on agricultural datasets to identify key predictive features.
- Trained and evaluated the model to deliver accurate crop predictions, supporting data-driven agricultural decision making and made Pickle file to create API for Web Project using Stitch.

CivicSentiment | Python, FastAPI, Scikit-learn, NLTK

- Built a sentiment analysis platform using FastAPI, Scikit-learn, and Logistic Regression for real-time text classification across four sentiment categories.
- Performed hyperparameter tuning to optimize Logistic Regression performance.
- Serialized the trained model using Pickle and integrated it with a web-based prediction API.

RESEARCH INTERNSHIP

Human Action Recognition Intern | LNMIIT (On-site) May – Jul 2023

- Analyzed the KTH human action recognition dataset using Python and TensorFlow.
- Applied regularization techniques to improve model generalization and reduce overfitting.
- Built a reproducible, well-documented pipeline to support scalable experimentation.

CERTIFICATIONS

- Google Cloud Career Readiness — Google Cloud Learning Platform (May 2023): comprehensive coverage of cloud architecture, deployment, and management.

ACHIEVEMENTS

- Published a review paper in the IJNRD International Journal (2025).
