PROFESSIONAL SUMMARY

Master of Computer Applications (MCA) graduate (2026) with hands-on experience in machine learning, Python, and applied AI research. Skilled in taking projects from data exploration through model training and evaluation, with working knowledge of backend development and REST APIs. Seeking an entry-level AI/ML role to build production-oriented, data-driven solutions and grow within an engineering team.

EDUCATION

Master of Computer Applications (MCA) JECRC University	2024 – 2026
Bachelor of Computer Applications (BCA) JK Lakshmipat University	2021 – 2024
Senior Secondary (XII), Commerce Shree Swaminarayan Gurukul Higher Secondary – GSEB	2020 – 2021
Secondary Education (X) Shree Swaminarayan Gurukul Maruti Vidhyapeeth – GSEB	2018 – 2019

TECHNICAL SKILLS

Programming Languages: Python, C++

AI / Machine Learning: Model Training & Inference, Dataset Handling, Exploratory Data Analysis, Scikit-learn, Random Forest

Backend & APIs: Django, Django ORM, REST APIs

Databases: MySQL, RDBMS

Tools & Platforms: Git, Google Cloud Platform, Heroku

PROJECTS

Crop Recommendation System | Python, Scikit-learn, Pandas, Random Forest

- Built a machine learning system that recommends suitable crops based on soil nutrients and environmental conditions, using a Random Forest classifier.
- Performed data preprocessing and exploratory data analysis (EDA) on agricultural datasets to identify key predictive features.
- Trained and evaluated the model to deliver accurate crop predictions, supporting data-driven agricultural decision-making and made Pickle file to create API for Web Project using Stitch

Inventory Management System | Django, Python, MySQL, Bootstrap

- Developed a full-stack web application for inventory tracking, featuring secure user authentication and full CRUD operations for products and categories.
- Implemented search, pagination, and stock management to streamline daily inventory operations.
- Designed a responsive dashboard backed by a MySQL database for real-time inventory tracking.

RESEARCH INTERNSHIP

Human Action Recognition Research Intern | LNMIIT (On-site)

May – Jul 2023

- Analyzed the KTH human action recognition dataset using Python and TensorFlow.
- Applied regularization techniques to improve model generalization and reduce overfitting.
- Built a reproducible, well-documented pipeline to support scalable experimentation.

CERTIFICATIONS

- Google Cloud Career Readiness — Google Cloud Learning Platform (May 2023): comprehensive coverage of cloud architecture, deployment, and management.

ACHIEVEMENTS

- Published a review paper in the IJNRD International Journal (2025).
